

Product Name :
Wiring and Installation Booths With Ceiling 4 Persons

Product Code :
LIM-CAT-L0004-00002

Description :

Wiring and Installation Booths With Ceiling 4 Persons

Technical Specification :

Wiring & installation booths with ceiling, 4 persons.

Many important details must be observed in order to succeed in educating the electrical installation. These details can be different from place to place depending on local installation rules, installation systems, the background and levels of trainees training.

A few of the points that are common in most training situations is taken into account:

- (a) before training targets are defined clearly Any training to start.
- b) electrical regulatory requirements must Be observed.
- c) Safety and Security shall be an integral training component.
- d) the curriculum planning and actual practical breakdown and there must be completed theoretical projects.
- e) The equipment and materials used is standards, strong to resist heavy treatment beginners have compiled the training in such a way follows and should follow a pedagogical sequence. As far as possible, normal installation practice follow.
- f) Training monitoring and storage These factors include type of building construction, type of ceiling, wall and floor construction, wiring methods, installation requirements, etc. Wiring booth will build/boost the technician's confidence to a level that he/she can go and work on their own without any hesitations in terms of wiring and device knowledge.

The electrical installation booth is designed to give real-time hands on practice to students using standard electrical devices such as switches, distribution boards, sockets, Contactors, MCB, ELCB, and light fittings in a structure.
