

Product Name :
PC-Enabled System Trainer With Fixed Modules

Product Code :
LIM-CAT-L0017-00041

Description :

PC-Enabled System Trainer With Fixed Modules

Technical Specification :

PC-Enabled system trainer with fixed modules comprised of the following:

Master Oscillator – synchronized quadrature carrier, sampling and message signals

Buffer Amplifiers – two independent amplifiers with gain controls

Frequency and Event counter

Variable and fixed DC Voltage Output

Oscilloscope Display Outputs – AB switch on two channels for alternate signal comparison.

In-built 2 channel PC-based instrument with ext trigger input, 500MS/s per channel, providing oscilloscope, spectrum and meter displays

Trunks – potential for networking option.

Headphone Speaker Amplifier and 3kHz LPF

Built-in Power Supply

PC-Enabled System Trainer With Fixed Modules, PC-Enabled System Trainer With Fixed Modules Bulk Suppliers, PC-Enabled System Trainer With Fixed Modules Tools, PC-Enabled System Trainer With Fixed Modules PC-Enabled System Trainer With Fixed Modules, PC-Enabled System Trainer With Fixed Modules Manufacturers, PC-Enabled System Trainer With Fixed Modules Suppliers from India, China, Kenya.
