

Product Name :
Power Generator

Product Code :
LIM-CAT-L0021-00014

Description :

Power Generator

Technical Specification :

Power Generator

A power generator with manual start is perfect for emergency power supply: a central heating furnace, home, office, camping, industrial equipment, as well as on boats and yachts.

The genset engine's rubber stabilizers and engine mounts dampen vibrations and minimize noise.

The generator is equipped with a microprocessor controlled by the Smart Throttle Technology, which adjusts the engine speed to exactly match the current load. If the generator does not supply many devices, it works at a slower speed. Thus, the generator reduces fuel consumption, extending the life of the engine and increasing the runtime between refueling.

The unit is equipped with an Automatic Voltage Regulation system AVR, which allows to largely eliminate adverse voltage fluctuations, which can be dangerous for many modern and delicate devices.

Power generator with all its mechanical and electrical accessories for the supply of energy to the plant.

Power Generator, Power Generator Bulk Suppliers, Power Generator Tools, Power Generator Power Generators, Power Generator Manufacturers, Power Generator Suppliers from India, China, Kenya.
