

Product Name :
Rain Gauge

Product Code :
LIM-CAT-L0042-00013

Description :

Rain Gauge

Technical Specification :

Rain gauge

Remote tipping bucket style rain gauge that measures the amount of liquid precipitation.

This scientific rain gauge and sensor is specifically designed to meet requirements for rainfall measurements.

Freestanding receptacle for measuring precipitation.

It contains an open top, which allows rainfall to fall into the upper portion, which is called the collector.

Collected water is funnelled to a mechanical device (tipping bucket), which incrementally measures the rainfall accumulation and causes a momentary closure of a switch.

As water is collected, the tipping bucket fills to the point where it tips over. This action empties the bucket in preparation for additional measurement.

Water discharged by the tipping bucket passes out of the rain gauge with no need for emptying.
