

Product Name :
Flushing Unit

Product Code :
LIM-CAT-L0010-00003

Description :

Flushing Unit

Technical Specification :

Flushing unit

Flushing unit for Cleaning Airco System.

Quick & Effective Cleaning: This fully equipped flush kit comes with the improved spray head for a steady spray can effectively remove refrigerant oil and debris during retrofitting or compressor replacement for R134 R12 R22 R410 and R404 A/C systems.

Easy to Operate & Space-saving: Simply fill the canister with flushing material then pressurize with shop-air and flush each component. While not in use it can be stored in a corner since it has lightweight and compact in size.

Work with Any A/C Flushing Agent: This flush kit is designed to work with FJC flush solvent. It is suitable for any light weight A/C flushing agent which can be mixed with pressurized air. With a large capacity, it can do many flush procedures.

Sturdy Construction & Built to Last: The air conditioner system flush kit is made of heavy-duty and superior aluminum, which is durable for lifelong use. Furthermore, the canister is reusable, which will stand up to years of wear and tear. No need to worry it will leak.

Pressure Relief Valve for More Safety: This upgraded version is equipped with the Pressure Relief Valve, which is released automatically when the pressure is over 170 PSI. This ensures safety from an accidental explosion.
