

Product Name :
Laboratory Fume Hood

Product Code :
LIM-CAT-L0047-00019

Description :

Laboratory Fume Hood

Technical Specification :

Fabricated out of thick Mild Steel Sheet these are designed so as to throw out toxic/harmful vapours, thus protecting costly instruments & the person working in the lab. The outer surface is finished with powder coated & inner surface is epoxy painted.

The working table top is fitted with acid/alkali resistant tiles/S.S & a small wash basin with connections provided for inlet & outlet of water. The front door moves vertically up & down with concealed counterbalanced weight. The unit is fitted with fluorescent light & a gas cock of gas/air supply. The space under the work station can be provided with storage compartments for storage purpose.

The front-facing panel is fitted with 15/5 amp socket with switches for exhaust system & fluorescent light to work on 220/230 volts AC Supply.
