

Product Name :
Air Compressor

Product Code :
LIM-CAT-L0050-00009

Description :

Air Compressor

Technical Specification :

Single Stage Air Compressor also has two pistons for pumping air; first piston compresses air and sends it into the second storage tank, or cylinder, where compressed air is stored for future use.

Single Stage Air Compressor is either powered by electricity or gas.

The electricity powered Two Stage Air Compressors are user-friendly and, thus more common. On the contrary, the Gas powered compressors can be used when there is lack of electricity or in areas where it is hard to use electricity.

The Single Stage Air Compressors provide power to pneumatic tools such as spray guns, ratchet wrenches and air nailers.

They can be used in gas stations and various manufacturing plants.

Single stage.

Capacity: 120-200Lts.

With A.C. Motor 2.5 – 4 hp

Auto control Switch.

With 20m hose, 1liter painting gun with all accessories.
