

Product Name :
Portable Gas Burner With Automatic Electronic Ignition

Product Code :
LIM-CAT-L0071-00002

Description :

Portable Gas Burner With Automatic Electronic Ignition

Technical Specification :

Portable gas burner with Automatic Electronic Ignition
Portable, high-performance butane stove.
For Indoor Commercial Use, the High-Impact Carrying Case.
Automatic Electronic Ignition, with Safety stop to prevent overheating.
To boil up to 500 ml water for 30 min.
High heat output of 10,000 BTUs with an adjustable heat control ranging from simmer to boil.
Maintains high and consistent heat output with a heat transfer plate and a double wind guard to reduce loss of heat from breezes or A/C.
The single high quality brass burner holds heat well and reduces the risk of warping, deformation and corrosion.
Equipped with a Piezo electronic / automatic ignition system – no need for matches!
Features an overheating safety stop and in-line regulator with a pressure-sensing shut-off. The stove will automatically shutdown when it senses overheating.
